NEW DELHI 3 (INDIA); }  
The 27th March, 1950.

S. P. JAIN,  
for Registrar General, India.

# NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

**TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT**

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 25th February, 1950—*contd.*

In cases of towns where there have been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

\* Figures not available.

Explanation of symbols used :— B = Births ; B. R. = Birth rate ; C = Cholera ; S = Smallpox ; P = Plague ; F = Fevers ; D. D. = Enteric and Diarrhoea ; R. D. = Respiratory diseases ; M. D. = Maternal Deaths ; D. R. = Death rate ; I. D. = Infantile Deaths (included in Death).

## REMARKS

The figures of births and deaths shown in this statement for the week ending the 25th February, 1950 relate to 151 towns with an estimated population of 21,599 thousands. The total number of towns is 224 and their population is 27,926 thousands. Thus 67% of the total number of towns representing 77% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 10,846 and 7,131 representing birth and death rates of 26.1 and 17.2 per thousand of population respectively.

(A) *States (Parts A & C).*—The data here relate to 125 towns with an estimated population of 18,476 thousands. Information about Assam, Bihar and Madras could not be included. The total number of towns is 192 and their population is 24,354 thousands. Thus 65% of the total number of towns representing 76% of the total population is covered. The numbers of births and deaths recorded in these towns

were 9,299 and 6,302 representing birth and death rates of 26.2 and 17.7 per thousand of population respectively. The table at the end gives the position by States.

Malegaon in Bombay was the only town which had a high death rate of 85.0 per thousand of population and this high death rate was mainly due to deaths from fevers.

(B) *States (Part B).*—The data here relate to 26 towns with an estimated population of 3,123 thousands. The total number of towns is 32 and their population is 3,572 thousands. Thus 81% of the total number of towns representing 87% of the total population is covered. The numbers of births and deaths recorded in these towns were 3,123 and 829 representing birth and death rates of 25.8 and 13.8 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
